Brainster Mentor class II - Simple html & css page

Info/Sending:
- Each group needs to come up with **1 file** named ***mentor-class-group-*number*** for example: mentor-class-group-1.
- Send the file to the mentor in a private message on slack.

** Please use google chrome as a browser for the fonts to work.

Tasks:
- You will get a starter files and you will have to write all the code in those ones. **Do not remove anything from them** that's already there, otherwise some of the css rules might not work.
- The design that you will have to make is shown on the screenshot that is also sent as well as the video (check the hover effects on it).
- All the colors and fonts are sent in the specs.txt file, check it out.
- The social icons should be links that lead to nowhere, put # inside href.
- Use *Fontawesome* for the icons (it's already linked in the head on the starter file):
    1. The A - icons is called autoprefixer (when you search for it)
    2. The social icons are facebook, instagram and twitter
